University of Texas at Austin

Bachelor of Science (B.S.), Electrical and Computer Engineering
GPA: 3.53

May 2024

TECHNICAL EXPERIENCE

Product Analyst - *LPL Financial*; Austin, TX

June 2024 - Present

- Managing a \$2MM project, triaging 50+ platform defects to resolve critical customer issues and ensure stability
- Facilitating distinct product backlogs across 4 separate agile teams, balancing priorities for 6 key stakeholders
- Defining an infrastructure modernization roadmap to support 100+ business rules and meet FINRA regulations
- Driving E2E strategy across 2 products with UX to improve the account opening experience for 30k+ clients
- Developing benefit hypotheses to drive a dashboard measuring cost & time savings across 20 projects/initiatives
- Creating go-to-market strategies for the New Account Opening process & relaying them to 300+ clients monthly

Technical Product Manager - *PrivacyCheck, UT Center for Identity*; Austin, TX

Aug 2023 - May 2024

- Led production of a public AI-based Chrome extension to review data privacy policies across 100+ companies
- Evaluated 4 LLM vendors across cost, accuracy, and integration complexity for integration into a Python tool
- Engineered prompts to GPT-4.0 to deliver scalable, repeatable GDPR compliance scoring with 80% accuracy
- Delivered a streamlined, interactive application translating complex model outputs into clear user insights

Product Engineering Intern - *Cadence Design Systems*; San Jose, CA

May 2023 - Aug 2023

- Spearheaded a data mining enhancement to assist customers with debugging within the Innovus product
- Developed scripts in Python and TCL to analyze & evaluate 6 key data metrics to automate data processing
- Created a dashboard in YAML to depict visualization components for 100+ design bottlenecks to improve UX
- Orchestrated workflow by implementing a tracking feature to monitor the roadmap of all 25+ data-mining OKRs

Electrical Engineering Intern - *Chevron Phillips Chemical*; Baytown, TX

May 2022 - Aug 2022

- Mitigated 15 potential outage risk scenarios by evaluating and designing safety instrumented systems
- Determined the accuracy of safety systems by utilizing fault tree diagrams to organize boolean logic and inputs
- Ensured system integrity by constructing/analyzing logic flow diagrams for programmable logic controllers
- Prioritized critical path to guide 4 different disciplines and 7 subject matter experts in assessing risk scenarios

ADDITIONAL RELEVANT EXPERIENCE

Product Manager - *Hardware Management Application*

Aug 2023 - Dec 2023

- Created a full-stack SaaS application to allow users to rent hardware sets based on availability assessments
- Steered workflow in Agile using roadmaps/user stories in JIRA to facilitate cooperation among 5 team members
- Designed frontend using React.js and implemented backend in Python/Flask with a MongoDB database

Co-Founder - *Timeouts with Texas Electrical and Computer Engineering*

Dec 2021 - May 2024

- Launched a safe haven to protect mental health and promote well-being strategies for over 1200 ECE students
- Assessed the initiative scope and developed a roadmap for key goals and deliverables utilizing user surveys
- Negotiated with key stakeholders within ECE to earn a \$2000 budget and determine a concrete event schedule

Marketing Lead - *Women in Electrical and Computer Engineering*

Dec 2020 - May 2023

- Functioned in an agile manner to set up a project backlog and organize officer workflows for 8 officers
- Produced marketing content to increase underclassmen event engagement by over 150% yearly
- Managed weekly newsletter, club calendar, Slack, and other lines of communication to 85+ members

SKILLS AND CERTIFICATIONS

- **Certifications:** Google Project Management, Google Data Analytics
- **Product:** User stories, roadmapping/discovery, sprint planning, workflow design, KPI analysis, GTM Strategy
- **AI/ML:** OpenAI API, Google Gemini, Hugging Face, LLM prompting & evaluation
- **Languages & Tools:** JIRA, Confluence, Tableau, SQL, Python, AWS, Java, JavaScript, React.js, C++, HTML, CSS
